

# ScreenHub by Cirrus

Experience the endless creative possibility

## On-premise marketing has never been easier to manage

ScreenHub, the most revolutionary cloud-based digital signage software on the market, is the only software you need to run all the digital signage for your business, from roadside to register. Quickly create, schedule, and play content for your signs or TVs. From sharing promotions or services, to cheering on the local champions, ScreenHub helps you make a memorable and cohesive experience for your audience where it matters most.

With 24-hr continuous playback, role-based access for your team, and real-time display monitoring, this simple and intuitive software helps you stay top of mind, while giving you peace of mind.

## Features

### EASY-TO-USE

No design experience? No problem! Easily move elements around the screen; enlarge, shrink, rotate, animate content; play around with all the possibilities.

### NEW! REMOTE MONITORING

Get real-time health monitoring without the hassle or expense of cameras! From power fluctuations to LED Panel Outages, real-time-monitoring alerts support when an issue arises - all from within your hardware dashboard.

### CLOUD-BASED

Allows ScreenHub to continually improve and add new features with updates pushed through the cloud.

### NEW! ROLE-BASED ACCESS

Collaborate with and manage your team easily in our new Workspaces. Use admin managed access levels to invite your teammates and 2F authentication to keep your signs secure while creating together.

### WIDGET & MEDIA LIBRARY

Access high-quality images or videos for your ads. Use widgets for weather, time, Twitter, live-streaming, and more! Outages, real-time monitoring alerts support when an issue arises - all from within your hardware dashboard.

### HARDWARE AGNOSTIC

Compatible with all synchronous systems (such as Linsn LED, NovaStar, and DBStar) that run Windows or Linux.
